

IRMA TIMES

No. 16 Vol. IV

Irma, Alberta, Canada, Friday, June 11th 1920

\$1.50 Per Year in Canada; Foreign Countries \$2.00

LOCAL NEWS

Miss M. McFarland has been a visitor in town for a few days.

Mrs. I. J. Mildon returned to Irma after a fortnight's visit in Edmonton.

W. E. Edwards is spending a two weeks vacation at Delusive Beach.

The foreman of the Irma west section was heard using language of a seditious nature a few days ago. A few of the citizens called on him and he has left town.

The rain and wind storm on Tuesday caused a little damage around town, a few windows being broken, and barns overturned. Mr. Wyatt's real estate office also took a notion to travel much to his discomfort.

Strawberry Plains school baseball team won a hotly contested game from Sunny Brae on June 5th.

W. L. Mildon spent the week-end at Delusive Beach and reports the water in fine shape for bathing. You may as well get your bathing suit patched up and try this next week-end. Six miles of sand and the best bathing in the country. Only a half hour by motor from Irma, straight north. Its all free.

The Young Colt.

A few minutes work while the colt is still running with the "are" will suffice better than the same number of hours when the colt is two or three years old for breaking him to the halter. The chief advantage of the halter-breaking early in life is not so much that it is accomplished with less effort but that the colt may be handled with in any way desired. If such is the case he will receive better treatment and better care. If halter-broken, his feet may be properly cared for and crooked legs prevented. Usually no trouble will be had in getting the colt to lead but if stubborn a rope may be passed back of the halter sling, and a loop dropped over the rump and placed so that it will bind the colt's thighs. If this was pulled upon rather than the halter the colt will usually walk up without any trouble. If the colt is tied a rope should be passed thru the halter and around the belly and tied in that manner. Then when he pulls upon it, it will tighten around his belly and pull there instead of on his head.

Notice.

The Council of Rural Municipality of Battle River No. 423 will meet for court of Revision on Friday June 18th at 10 A.M.

Baseball Dope.

The Irma team played a practice game at Kinsella on Saturday, June 5th and won from Kinsella 9 to 0. The players were greatly handicapped by the size of the diamond, it apparently being the one used by the school children.

The Junior Baseball Nine were unfortunate in being defeated here on June 3rd by the Wainwright high school team 9 to 7. However Manager Lennon intends to turn the tables on them the next time they meet.

Injured In Accident.

While driving a team of young colts near the Battle River hill, Mr. and Mrs. Wm Santee were the victims of an accident that might have well been more serious. As it is Mrs. Santee is suffering from scaly wounds, resulting from being violently thrown from the buggy and Mr. Santee was more fortunate in escaping with minor injuries. It appears they were on the hill when a passing car frightened the team of colts, causing them to overturn the buggy.

Alberta Fairs

The following are the dates of the fairs to be held in the Province this year:

Loughheed, August 10.
Strome-Killam, August 11-12.
Provost, August 12.
Chauvin, August 13.
Castor, August 20-21.
Viking, August 9-10.
Irma, August 11.
Holden, August 12.
Charosholm, July 29-30.
Staveland, August 3.
Vulcan, July 31.
Macleod, August 4-5.
Granum, August 6-7.

Favorable Crop Conditions.

Favorable moisture conditions and rapid completions of seeding are the outstanding features of the crop situation throughout the Viking district.

Wheat seeding was completed a week ago, except for small belated areas and before another week passes the oat crop except that intended for green feed will all be in the ground. Many of the farmers in the district have already entirely completed seeding operations.

This season despite the late spring conditions are most favorable. Light showers have kept the moisture moving up to the roots of the crop but have not been heavy enough to check seeding.

This condition is highly favorable contrasts with conditions in the district the first of June last year when warm winds and alarming lack of moisture made the outlook exceedingly grave.

Reports regarding the stock situations are very optimistic. Grass on the prairie is the best in years. Stock losses are a thing of the past. Loose horses have considerably improved and are picking up rapidly. —Viking News.

IRMA LOCAL L.O.L. No. 2066

The lodge was held on Wednesday, June 2nd, when six brothers were advanced to the Royal Blue degree and one to the Royal Arch Purple degree. A special lodge will be held on Wednesday, June 23rd when it is expected several brothers will be advanced to the Royal Arch Purple degree and it is the intention of the officers to fill the chairs at 8 p.m. sharp.

VIKING

June 3rd, the King's Birthday, turned out to be quite a day in town most of the business places and stores closed at 2.30 so that everybody had a chance to get out to the ball grounds to see the opening of the Junior baseball season. Viking and Vegerville teams crossed bats.

The first innings were decidedly in favor of the visitors who fell on the slants of H. Hilliker and connected for four runs in the first and three in the fourth after which W. Brown took up the burden and the locals steadied down to baseball allowing only one run till the eighth.

Our representatives were woefully weak at the bat, but showed improvement as the game progressed. One run in the first, one in the third, two in the sixth, three in the seventh, and one in the eighth evened up the score.

The ninth inning spelled disaster for Viking when the whole team took to the air, and five Vegervillians came home safely. Viking squeezed in a run in the ninth before the game ended, 13 to 9 in favor of the visitors.

After the ball game, the Holden and Viking girls basketball teams entertained the crowd to an excellent exhibition of basketball, the game that is gaining more favor each year. The first half ended 12 to 4 in favor of the Sunbeams and after ten minutes rest, the teams lined up again for the second half which was a repetition of the first. Viking scoring 10 and Holden 2, the game ending 22 to 6 in favor of the Sunbeams.

Roseberry U.F.A.

Roseberry Local of the U.F.A. will hold a dance and picnic at Roseberry on Friday June 25th. Picnic commences at 2.30 p.m. Tickets—Gentlemen \$1.00 Ladies free. All ladies are kindly requested to bring baskets.

Sunny Brae School

Enrollment—19. Number of teaching days school was open in the month—18. Average attendance 16.9. Perfect Attendance—Harry Lennon, Georgina Fenton, Earl Lennon, Hilde Hubman, Amelia Hubman, Sidney Knowles, William Kelm, Herbert Kelm, Alice Sissons, William Hubman.

Grade II Norma McConnochie promoted to Grade III. Closing Exercise, June 26th. Everybody welcome. Mabel Christenson Teacher.

U. F. A. Meeting

Mr. H.E. Flett, a special representative of the U.F.A. will address a meeting of the U.F.A. that is being held in Irma on Thursday afternoon June 10th, commencing at 2 o'clock. All members please take notice.

FABYAN

Steve Krozier is seriously ill. The bone cancer for which he had his leg amputated at Rochester last fall has affected his lungs and the best doctors have given up hope his case. His many friends are much concerned over this.

There was a dance in Lewisville school the night of the 24th.

The Rockyford baseball is reorganizing the original team being widely scattered.

"Real Estate" has been "going up" and changing hands lately around here and there seemed to be no difficulty in "raising the wind" for the transactions while were mostly exchanges according to the direction of the wind.

Cuticura Is What You Need For Your Hair and Scalp

Dandruff kills the hair. Cuticura kills dandruff. Try this treatment. Before retiring rub Cuticura Ointment into parts all over the scalp. Next morning shampoo with Cuticura Soap and hot water. Rinse with tepid water. Dandruff usually disappears, hair stops falling and becomes thick, live and healthy.

Box 256, Ointment 25¢ and 50¢, Sold Throughout the Dominion. Dr. J. C. Murphy, Limited, St. Paul St., Montreal.

Love of The Wild

— BY —

ARCHIE P. McKISHNIE

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued.)

"Are you feelin' no better, Ma?" he inquired gently.

"Yes, Boy, better. 'I'll soon be well."

He understood, and he held the hot hand, stretched out to him, in both his own.

"You're not quite as well as you was this mornin'," he said, hesitatingly: "I guess I know the reason."

She did not reply, but lay with her eyes closed, and Boy saw tears creep down the white cheeks. He spoke fiercely.

"He threatened as he'd do it, and he did."

He checked himself, biting the words off with a click of his white teeth.

"I know just what he told you, Ma. I know all he told you, and he didn't lie none. I haven't been to his school and I can't go to his school. I've tried my best to stay, 'cause I knowed you wanted me to. But I go wild. I can't stay still inside like that and be in prison. It chokes me, I tell you. I don't want more learnin' than I have. I can read and write and figure. You taught me that, and I have learned from you 'cause—"

His voice faltered and feebly the mother drew him down beside her on the bed.

"Poor old Boy," she soothed tenderly, smoothing the dark curls back from his forehead, then sorrowfully, "I wonder why you should hate that for which so many people are striving?"

"Don't ma — don't speak about it. You know we talked it over before. You called it enlightenment, you remember. I don't want enlightenment. I hate it. I'll fight it away from me, and I'll have to fight it—and then!"

He shuddered, and she held him tight in her weak arms.

"Dear Boy," she said, "it will be a useless struggle. You can't hope to hold your little world. Now go, and God bless you. Kiss me goodnight, Boy."

He bent and kissed her on the forehead, then springing up crossed the room. At the door he halted.

"Yes, ma," he said, gaily in response to her call.

"Did you meet the teacher?"

One moment he vacillated between love and truth. Once he had lied, uselessly, to save her. But he hated a liar. He went back to the bed slowly.

"Yes, I met him, and I told him that the best he leavin' these parts."

Her eyes rested upon him in mingled love and wonder.

"I don't like — I don't trust that man," said the mother earnestly. "Now go, Boy, and God bless you."

When Boy sought the table again the tea and meat were stone cold. He smiled at the girl, who was standing beside the fireplace, and she said, teasingly:

"I told you you better not go."

The man with the fiddle across his knees straightened up at her words, and he looked over at Boy with a

puzzled expression on his face.

"Thought maybe you'd joined a flock of woodcock and gone south," he remarked. "Wonder you can leave the bush long enough to get your meals. Where've you been, Boy?"

"Nowhere much," answered the boy, looking hard at his plate.

"Well we had that teacher clap over again tonight," said the father, "—smart feller that."

Boy glanced up quickly and caught a gleam of humor in the speaker's eyes. Then he looked at the girl. She was laughing quietly.

"The teacher says that you've been absentin' yourself from school," went on the man. "I asked him if absentin' was a regular habit in scholars same as swappin' jackknives, and you ought to have seen the look he gave me."

"It's a punishable offense," said he.

"Well, I don't mind you whaling Boy some," says I. "I'm sure he needs it."

"I won't whip a big boy like him," I don't have to and I won't."

"Well I don't know as I blame you for not wantin' to," says I. "Boy's some handy with his fists, bein' a graduate in boxin' of long Bill Paisley's."

The big man stood up and stretched his six-foot two figure with enjoyment. In his huge fist the old fiddle looked like a hand mirror. He threw back his shaggy head and laughed so loudly that the burning log in the fireplace broke in twain and threw a shower of red and golden sparks up the wide chimney.

"When we were talkin' and I was coaxed, the visitor set up to supper and make himself at home, who should drop in but Bill Paisley himself. Gosh, it was fun to see how he took in the teacher. 'Nice night, sir,' says Bill, 'boxin' low and liftin' off his cap. I shook my head at him, but he didn't pay any attention, so I went on eatin' and let 'em alone. Bill got out his pipe and felt in all his pockets, keepin' his eyes right on the teacher and grinnin' so foolish I nearly choked on a pork-rind."

"Would you mind obligein' me with a pipeful of Canada-Green?" he asked.

"I suppose you have a plug of twist in your pocket, sir?"

"The teacher frowned at him. 'I don't smoke Canada-Green,' says he, short and crisp-like."

"Chaw, maybe?" grinned Bill, puttin' his pipe away and kickin' his lips expectant.

"No, nor chaw—as you call it?"

"Do me," sighed Bill, and after a while he says, 'dear me' again."

"By and by Paisley lumbered up and told the teacher he was right down glad to meet a man fearless enough to come to this wild place in the cause of learnin'."

"You're a martyr, sir," says Bill, a brave man, to come where so many dangers beset the paths. 'Swamp fevers that wither you up, and ague that shakes your front teeth back where your back teeth are now and your back teeth where your front ones should be. There are black snakes in these parts,' says Bill, 'that have got so used to bitin' Injuns they never miss a stroke, and they'll travel miles to get a whack at a white man, particularly a stranger, says he. 'Then there be wolves here big as two-year old steers, and they do get hungry when the winter sets in.'"

"The teacher squirmed. 'I'll get used to all that,' says he."

"Sure," agreed Bill, "but just the same it's a good thing you're a brave and a lousy chap. Met any of our Injuns yet?"

"A few," said the young feller, lookin' scared.

"Injuns are mighty queer reptiles," says Bill, "but you'll get along with 'em all right if you humor 'em with presents and attend their pow-wows. Might be a good idea to let on there's Injun blood in you. But whatever you do, if you should happen to have a little nigger blood in you, don't tell 'em. Injuns naturally hate niggers."

"Bill got up and went in to say 'howdy' to Ma. 'She wants to see you mister, he says to the teacher, when he came out. 'I suppose you've learned among other things, that there's such a thing as talkin' too much, so be careful.'"

"When Bill went away Gloss and me sat down and listened to what Simpson and your ma had to say to each other. He told her all about you stayin' away from school and a lot of things that seemed to worry her. I thought it queer, 'cause ever since he has been comin' across here we've tried to make him feel at home. But I just put it down that he had it in for you, Boy, on some account or other."

Boy glanced at the girl and her eyes fell.

"If it hadn't been our own house, I would have thrown him out," McTavish declared.

"I met him down by the creek as I was comin' home," said Boy ab-

sently. "I told him he'd best be leavin' these parts."

The girl came over and leaned across the table toward him.

"Boy," she said, "do you think he will go?"

"Would you rather he'd stay?" he asked quickly.

"No."

"Then he'll go."

(To be continued.)

She Says She Can Now Do Her Work

MRS. M. MAGNANT GIVES THE CREDIT TO DODD'S KIDNEY PILLS

Her Back Ached and She was Always Tired, But She States She Found The Relief She Longed For in Dodd's Kidney Pills.

St. Lina, Alta., June 7th.—(Special).—"Thanks to Dodd's Kidney Pills I can now do my work." So says Mrs. M. Magnant, a well known and highly respected resident of this place. Mrs. Magnant was a sufferer from that terrible weariness so many women know.

"My back ached," she says, "and I felt so tired all the time. But she used Dodd's Kidney Pills. She persevered with them, taking sixteen boxes in all, with the result given in the glad words of the opening paragraph.

"Other women in all parts of Canada make the same statement. They were weighed down with weariness, weakness and pain, and found the relief they longed for in Dodd's Kidney Pills. For sick kidneys are the cause of the great majority of the ills from which women suffer. To treat them the kidneys must be strengthened so they will strain all the impurities out of the blood.

Ask your neighbors if Dodd's Kidney Pills do not help sick kidneys.

Not for Disarmament

The Simple Way of Guaranteeing Peace of the World

At the Cramp yard, Philadelphia, says Chas M. Schwab, the United States is building the biggest warship on record—a monster battle cruiser 1,000 feet long, 104 feet beam, and of 60,000 tons displacement. Twelve 16-inch guns will constitute its main batteries, and its speed will be greater by ten miles an hour than that of the Lusitania.

The construction will cost \$50,000,000. Mr. Schwab looks forward to the building of a flotilla of such vessels.

And the words in which he predicts and justifies more numerous and larger battleships have an ominous familiar ring. We have heard them before, we have heard them, if our memories fail not, long before the war. They were, dimmed into our decades, until we had them by heart, and knew the exact order in which the phrases and arguments would fall.

"The building of enough of these ships," says Mr. Schwab, "will be a simple way of maintaining peace with the world. Not that the fighting men desire peace, but because of the fact that when we have such a formidable array of power it is not likely that any country will take upon itself to encroach upon our rights. These new ships will be no more powerful and speedy than they should be for the protection of the great United States of America."

So the war was a dream; it never happened. The huge armaments of Europe prevented it. England, France, Russia and Germany, all prepared for hostilities, were naturally afraid to start anything, or we certainly should have seen some fighting in 1914 and later. But let Mr. Schwab take a look at Europe and tell us why things are as they are on that unhappy continent. Let him tell us, too, after looking into conditions, whether it seems to him more necessary to put our superfluous effort into rehabilitating the crushed and shattered systems of our neighbors or to get ready for war against them. Surely there are some forms of silliness we have earned the right to forget.—New York Globe.

Canada's Import Trade

Doing Large Business With Germany And Austria

Information was recently given by the government in the house of commons regarding Canada's trade with her late enemies. It was stated that the total amount of imports from Germany and Austria during 1919 was less than one quarter of the total amount of these imports during the first three months of 1920. During the year 1919, goods to the value of \$1,041 were imported from Germany and to the value of \$779 from Austria. During the first three months of 1920 Canada imported goods to the value of \$30,233 from Germany and to the value of \$16,944 from Austria.

Free Speech In America and Russia

What Is Right In Russia Seems To Be Wrong In United States

"What's right for me is wrong for you," argues the child. Primitive man argued that way, and to the limit of his ability enforced his argument with a club. Fanatics of all stripes still continue the argument, and they translate it, if they gain power, into law. The absolute suppression of free speech, free press, and free assembly in Russia is revolutionary virtue; the punishment of outright sedition in America is vicious reactionism. All the pro-Bolshevist writers and speakers are agreed; and though the more pretentiously virtuous exponents of uplift by usurpation cloak their meaning with euphemisms, the more straight-forward advocates disdain the use of veiled words. On the front page of the Appeal to Reason for April 17 is an interview with Eugene V. Debs in which the argument is stated in plain terms. "If it was right," Debs was asked, "for Russia to suspend free speech and free press, was it not also right for the United States to suspend free speech in your case during the war?" "No," replied Debs. "The Russian revolution was a forward step. American participation in the war was a reactionary step. In suppressing me, because I was a revolutionist, a backward step was taken." Naive, infantile, amusing—what you will, but how honorably this speech contrasts with the intellectual and ethical thimble-rigging of the pretentiously pious journals of uplift!—New York Review.

Every family in France that maintains a servant is taxed 40 francs for each one.

Copperas is an iron compound, and contains no copper.

HEART SO BAD WAS NOT SAFE TO LEAVE HER ALONE

Miss Eva P. Yatemann, Krugersdorp, Out., writes: "I feel that I must write and tell you of the benefit I have received from Milburn's Heart and Nerve Pills. About four years ago I was taken terribly bad with my heart, nerves and fainting spells, and was down in bed for about six months. I doctored with two different doctors and seemed to get better, although the fainting spells would not leave me. I would take such terrible falls, wherever I was, that it was not safe to leave me alone at any time. At last I decided to resort to proprietary medicines and took several different kinds, but seemed to receive but little benefit from them. One day noticing the advertisement of Milburn's Heart and Nerve Pills I decided to try them, and before I had taken more than two boxes I could see they were helping me. I have taken about ten boxes, and an almost cure of those terrible spells. I sincerely feel that your medicine has proved a blessing to me, and I advise any one troubled with their heart to try them, as I am confident they will find relief."

Milburn's Heart and Nerve Pills are 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

No, Harry, a man doesn't necessarily have paint in his eyes when he is color-blind.

Advice to the Farmer

Gems of Advice To Farmers From The East

A prominent "farm" publication arriving from the east has these gems of advice to farmers:

"To be healthy one should spend considerable time in the open air every day without fail.

"Exercise enough to keep the muscles from getting soft and flabby.

"A heavy dinner in the middle of the day is inadvisable, as one may become sluggish later and be unable to concentrate on details requiring close attention.

"Live near to nature; take an interest in things out-of-doors; it provides a splendid tonic for the nerves."

The Newspaper

Daily the newspaper lays before its readers something about most of the occurrences in its field. From sixty to seventy thousand words an issue have to be composed in order that the product of a vast assembling organization may reach the homes of a city and its district. The costs have become tremendous, yet the service is about the cheapest thing of value that the public can buy today.

—Ottawa Journal.

Neither

The Baltimore American tells about a little girl who was astonished and appalled by a question the teacher asked her. The question was this: "Can you tell me whether you are an invertebrate or a mammal?"

"Please Miss," she stammered, "I don't think I'm either. I'm a Methodist."

MOTHER!

"California Syrup of Figs"

Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruit taste. Full directions on each bottle. You must say "California."

May Adopt Torrens System

The suggestion was made and favorably considered in the Ontario Legislature for a change in the present system of land titles registration to something along the lines of the Torrens system as now employed satisfactorily in Manitoba, Alberta and Saskatchewan. A special committee was appointed to consider the matter.

The enjoyment of beautiful flowers is common to all the inhabitants of Japan. Even the humble laborer is a customer at the gardens where the flowers are kept for sale.

SMOOTHEST REGULATOR FOR THE BOWELS

IS HAMILTON'S PILLS

No Headache, Billiousness, Indigestion, or Sour Stomach, Where They Are Used

King Edward's Horse

Records of Regiment Being Compiled By Lt.-Col. James

Records of the members of the 1st King Edward's Horse, both living and deceased, are being collected by Lt.-Col. L. Jamies, commanding officer, for the purpose of compiling a regimental history. He will try to obtain all particulars with regard to every member of the regiment, and wishes that relatives of men who have died would send the date and circumstances of their death to the adjutant, King Edward's Horse, Duke of York's Headquarters, Chelsea, London, England.

A memorial to those of the regiment who were killed or died in France during the war is being erected at Vieille Chapelle, on the line where the regiment held up a German division from sunrise till sunset during the great attack in 1918.

Farmers and Advertising

Farmers are learning the value of advertising. There are large users of space in the advertising columns of local newspapers throughout the country. Auction sale lists are not found first in the papers and though bills are usually printed too, the ad. in the local papers is found to be much more effective than the time-honored bills.—Walkerton Telescope.

As a rule a man's sugar-coated sweetness wears off with the waning of the honeymoon.

Used for 70 Years

Thru its use Grandmother's youthful appearance has remained until youth has become but a memory. The soft, refined, pearly white appearance it renders leaves the joy of Beauty with you for many years.

Gouraud's Oriental Cream

Solely for the Face and Skin.

Vanderhoof Has A Future

Bright Prospects Ahead of the Nechako Valley District

A thriving British Columbia town that has a very bright future before it is Vanderhoof. Situated in the Nechako Valley on the Grand Trunk Pacific railway, midway between Edmonton and Prince Rupert, it is the centre of a fine agricultural district, currently suitable for mixed farming. The soil in the Vanderhoof district is almost inexhaustible and is easy to clear. The land in the Nechako Valley produces wonderful crops of grain and timothy hay, as well as fine vegetables. Settlers are fast filling up the country, and the Soldiers' Settlement Board has placed a number of returned men on the land. The government is establishing a creamery at Vanderhoof, and undoubtedly it will become the centre of a great dairying district. Much of the land is suitable for steam plowing and the timbered area furnishes good shelter for stock. Sheep raising and mixed farming generally will prove very profitable.

There is fine fishing and good hunting close at hand, mineral wealth in the district, and a pleasant and mild climate.

New Building Material

Experiments are being carried on in building houses from marble dust and sawdust at Vancouver. It has been claimed that the cost of the houses in construction will be six cents a foot in place of 60 cents a foot for ordinary building materials. The new material is claimed to be durable and take a high polish.

Japan practically no women except a few uniformed girl students wear shoes.

Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills arouse these organs to activity they thoroughly cure indigestion and overcome the many annoying symptoms.

Dr. Chase's Kidney-Liver Pills

Bolshevists Lowest Types of Humanity

First Hand Information Acquired In Intelligence Department

"If once the Russian people were freed and allowed to vote the Bolshevik regime would vanish like smoke, but they are kept down by machine guns and massacres," declared O. D. Stevenson, B.A., of Toronto, a former Stratford boy, at a chamber of commerce luncheon. Mr. Stevenson told of the Red movement from first-hand experience, while in the British intelligence department.

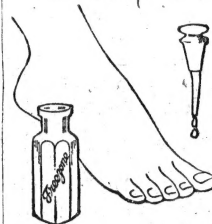

The Bolsheviks he termed the lowest type of humanity who are living by blood and fire with German money and organization to a large extent, but not entirely, behind the movement.

After quoting a literal translation of a proclamation taken from the walls in many towns of Russia, of "Nationalizing Women," Mr. Stevenson said that tens of thousands of decent women committed suicide. Those who refused to be nationalized were tortured in a most fiendish manner and then ravished until they died, after which their bodies were quartered and hung up to frighten others.

With a threat of torture recruits for the Bolshevik ranks were secured. "In one city no larger than Toronto," said Mr. Stevenson, "over 150,000 persons were massacred in three or four months. One of the main streets had, when we entered, between 8,000 and 10,000 dead bodies hung on poles, posts, trees, etc., the men with their vital parts hung around their necks, their eyes pulled out, with imitation epaulettes nailed to their shoulders and horseshoes nailed to their feet. One cannot conceive of any human being acting in the way these devils in human form acted. A dead set was made against religion, and many of the priests were crucified at their altars."

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet. A tiny bottle of "Freezone" costs little, any drug store apply a few drops upon the corn, or callus. Instantly it stops hurting, then shortly you lift the bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Shipping Grain to U.S.

Large Shipments of Alberta Wheat And Oats Go To The United States

Wheat valued at more than one million dollars has been shipped from the province of Alberta to the United States and chiefly to the state of Montana from January 1, to April 30, 1920, states S. C. Reat, United States consul at Calgary, Alberta. During the same period more than one million bushels of oats were also shipped across the line.

Most of the wheat was shipped across during January and February and the highest price paid was \$3.25 a bushel, while the average was \$3.06. Oats averaged 60 cents a bushel and one shipment \$1.05 was paid. The large shipments of wheat during the first part of the year were caused by the lifting of the embargo on wheat in the United States on December 15. The demand for oats, especially in Montana, created a good price, and that, together with the exchange situation, were big factors in increased shipments of oats.

During the first four months of the year, a total of 374,430 bushels of wheat, valued at \$1,157,562.82 were shipped into the United States from Alberta, as compared with 30,085 bushels valued at \$76,040.81 during the last quarter of 1919. The fact that the embargo was not lifted until December 15 must be taken into consideration in comparing the two periods. A total of 1,131,090 bushels of oats valued at \$674,319.53 were shipped out during the first quarter of this year, as compared with 77,985 bushels, valued at \$38,899 for the last four months of 1919.

SNUFFS OUT A COLD IN A FEW MOMENTS

Clears The Nostrils, Stops Sneezing Heals The Throat Quickly

Catarhazone Works Wonders

Lots of people used to let their colds "work off" — they suffered a whole lot, sneezed around the house, till the whole family finally caught the infection. Nowadays colds are cured by Catarhazone before they really get a good start. This healing vapor, full of pure essences, gives instant relief. It fills the breathing organs with a healing, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely sure for Catarrh, and in throat troubles, where like catarrh. Catarhazone is a permanent cure for bronchitis and throat trouble. Not an experiment — but a cure that is guaranteed. Get "Catarhazone" today, and beware of substitutes. The dollar outfit is guaranteed, and small size 50c; trial size 25c, at all dealers.

Alfalfa Cultivators

Proper Methods to Follow in Order To Ensure Success

Alfalfa may be sown with a nurse crop in parts with a good rainfall if the seedling down is done on land that is not more than one crop from having been summerfallowed. A light seeding of about a bushel of barley or a bushel and a peck of oats per acre is heavy enough seeding for a nurse crop. In the drier sections of the province and on land that has not been summerfallowed recently in the winter sections, seeding without a nurse crop will give much better results. When seeding with a nurse crop the alfalfa should be sown at the same time as the nurse crop. When seeding alfalfa alone, the land, if in summerfallow or hoed crop the previous year, should be top worked until about the first of June and may then be seeded. Stubble should be fall plowed and top worked in the spring until June and then seeded. Fifteen pounds per acre is the usual rate of seeding.

Northern grown alfalfa seed of the Grimm, Turkestan or Baltic varieties must be used. Grimm being harder than either of the other two. Before sowing the land or the seed must be inoculated with alfalfa nitro culture unless the land has grown alfalfa or sweet clover previously. Of the two methods, inoculation of the seed is usually easier, and gives good results. If these two precautions are taken, the first step necessary to success is assured.—N. D. McKenzie, Supt. Indian Head Experimental Farm.

Americans Interested In Western Lands

New York Financial Houses Investigate Lethbridge Irrigation Project

Investigation of the Lethbridge Northern Irrigation Project by two New York financial houses of high standing will be undertaken in the immediate future with a view to purchasing the bonds of the irrigation district, it was asserted by L. M. Roberts, a leading barrister, on his return to Calgary from New York. Mr. Roberts, who some time ago obtained an open option for the purchase of the bonds, went to New York in this connection. He anticipates that the inquiry into the irrigation undertaking by engineers sent out by the financial houses will take place in June. The terms of his option are not such as to interfere with the right of the irrigation district to make any other arrangements for the sale of the bonds which they may desire, and in the event of a definite offer being made the district will have the right to accept or refuse.

Prophecy Success

Gen. Sir Arthur Currie, before the war a lawyer and real estate man, won an enviable reputation as a war leader and became the commander of the Canadian Expeditionary Forces. He shows New World versatility again by accepting the offer, of principal of McGill University, Montreal, succeeding Sir Auckland Geddes, British Ambassador in Washington. Most fighting Canadians will prophesy for his success in his new post.—New York World.

Minard's Liniment used by physicians

Advertising His Want

She—And how is your bachelor friend? He—When I saw him last he was mending shoes. She—Indeed, I didn't know he had been ill. He—He hasn't been; he was sewing some buttons on his clothes.

W. N. U. 1319

Strangers to Truth

The preacher announced that next Sunday his subject would be "Lars" and that he would be very glad if during the week, they would read the 17th chapter of Romans for themselves.

The next Sunday the preacher commenced by reminding his hearers of the request he had made, and asked all those who had read the 17th chapter of Romans to stand up. To his astonishment half the congregation stood up.

"Thank you very much" said the preacher, "now it is to you I want to speak today, because there is no 17th chapter of Romans!"

A Losing Game

He—Life with me has been a failure. She—You must have had and wasted some opportunity.

He—No, I have spent half my life raising whiskers to conceal my youth, and the other half in dying them to conceal my age.

NOURISHING FOOD AND GOOD HOURS

Help You To Resist Disease — Aid These With A Tonic To Keep The Blood Pure

The power of your body to resist disease and to fight it after disease gets a foothold, is one of the most precious possessions you have. You weaken this power when you let your general health run down, your blood gets thick and your nerves unsteady.

You weaken it when you worry, when you overwork, when you do not get sufficient sleep, and when you are under-nourished, either because you do not eat the right kind of food or because your digestion is out of order.

You preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further increase and strengthen resistance to disease when you build up your blood and nerves by the occasional use of a tonic like Dr. Williams' Pink Pills, which are free from opiates and harmful drugs of any kind. The value of these pills as a health builder is fully shown by the experience of Mrs. E. C. Taylor, Hanover, N. H., who says: "At various times since I was a girl of fifteen I have proved the value of Dr. Williams' Pink Pills. At that age I was in a much run-down condition, suffering from many of the well known symptoms of anaemia. My mother procured a supply of Dr. Williams' Pink Pills, and after taking about half a dozen boxes I was restored to normal health. Again after my marriage, and before my boy was born, I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My latest experience with these pills was following an attack of pleurisy, which left me completely broken in health. Part of the time I was under the care of two doctors, and for three months I was practically between life and death. Again at my mother's suggestion I started the use of Dr. Williams' Pink Pills. I had not been taking them long before I could tell that they were helping me. Day by day I could feel my strength returning, and was soon enjoying good health once more. In view of my experience I think I can safely say there is nothing in the way of medicine better than Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The Only Safe Place

"Why," asked a Missouri paper, "does Missouri stand at the head in raising mules?" "Because," answered another paper, "that is the only safe place to stand."

DANDERINE PUTS BEAUTY IN HAIR

Girls! A mass of long, thick, gleamy tresses

Let "Danderine" save your hair and double its beauty. You can't give it long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic; then its life, color, brightness and abundance will return—Hurry!

Bees Culture is Profitable in Alberta

Edmonton Apiarist Proves That Bee-Keeping is Profitable

Bees have proved themselves not only adaptable to the climate of Western Canada, but very profitable to raise as a side line, and as an example of this, the experience of Mr. William Wensel, of Edmonton, may be given. Mr. Wensel has been keeping bees for the last six years. The returns he has obtained from them go to show that they can be reared economically, and that the honey produced is fully equal to any of the imported variety.

Mr. Wensel started with a foundation swarm of mixed bees. By using only well bred queens, which he imported from Tennessee, he managed, within a few years to so improve his swarm that he had an almost pure strain of Italian bees. He keeps from ten to fifteen hives of bees, disposing of the increase in the spring or fall.

From the standpoint of profit and prolificness, bees can hardly be equalled by any other member of the animal or insect family producing food for human consumption. In the spring of 1918 Mr. Wensel had nine hives, three of which were in very poor condition. During the summer the nine hives increased to 21, and honey produced, less the amount left for winter feed, was eight hundred and twenty-seven pounds. The honey sells at from 35 to 40 cents per pound. In 1918 the record of production from the apiary was 100 lbs. per hive, or at 40 cents per pound, \$40 worth of honey per hive.

Bees require very little attention in Western Canada. With a clover or alfalfa field in the neighborhood and supplied with sufficient comb and suitable hives, they will practically look after themselves for the whole summer. In the fall the hives containing the bees are either stored in a cellar or left out in the open. If the bees are left outside, a box large enough to cover the hive and leave a space of about four inches on all sides is put over the hive, and the space filled with chaff. An opening, however, is always provided. It has been found that when the hive is plugged up the bees will come to where the opening is and work until they die in their attempt to get out. On the other hand, when there is an opening they never go out unless on very bright sunny days.

Mr. Wensel's experience goes to show that it is better to winter the bees outside. They are not only more active and start to work earlier in the spring, but seem to be in far better health. However, if the bees are kept in a cellar over the winter it has been found best to take them out about April first. "Bees come out and are ready to start their season's work as soon as the warm weather begins. The hives are then cleaned out and the frames and comb put into place. From then on they require no attention until the end of May or the beginning of June. Between the warm of the season, if put in a hive of its own, may hatch out a second swarm. One season one of Mr. Wensel's swarms that were hatched in June produced 99 pounds of honey the same season.

It is the practice to take out some honey and put in a super with a queen excluded to induce honey production about the end of July. In September, all except 35 or 40 pounds of honey, which is left as winter feed, is taken out and the hives prepared for winter.

Rural Depopulation

Fathers of Our Farms Must Remember the Young Man's Needs

How shocking the facts would appear if we only had the statistics on how many young men have left the farms because their fathers drove them off! They just could not stand it any longer with their dads. A study of this side of the question of rural depopulation would be illuminating. It is tragic, the narrowness, bigotry, and prejudice, lack of vision, lack of appreciation, lack of sympathy and lack of praise and encouragement have done and will yet do in robbing the farms of their virile best young blood.

Surely the fathers of our farms must learn anew and remember the young man's needs—real and imagined—and his point of view; and give and get in return the requisite confidence, comradeship and understanding. Otherwise there is the loss—great loss indeed!—Rural Canada.

Don't worry over lost opportunities but keep your eyes open for the next one that comes along.

Dust from shoddy mills is used as a fertilizer in England.

Age of the Earth

How old the earth is can only be guessed, and it would be a bold man who would say that the best figures are those of the man who puts them in. In 1860 John Phillips estimated the age of the earth at between 38,000,000 and 96,000,000 years. Considerable difference in one man's figures. C. D. Walcott considered 70,000,000 as the maximum age. George H. Darwin has discussed the age of the earth from a purely astronomical point of view. From his theory of the earth-moon system he derived an estimate of more than 56,000,000 years.

TO WOMEN OF MIDDLE AGE

This Woman's Letter Tells You How To Pass The Crisis Safely.

Lascelles, P.Q.—"During the Change of Life I felt so weak and run down I could hardly do my work. The perspiration would pour over my face so that I could see what I was doing. We live on a farm, so there is lots to do. When I was in bed, I took Lydia E. Pinkham's Vegetable Compound, and it did me a world of good. I tried other remedies but I put Vegetable Compound ahead of them all, and I tell every one I know how much good it has done me."
Mrs. DUNCAN BROWN, Lascelles, Prov. Quebec.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ear, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness should be headed by middle-aged women, and let Lydia E. Pinkham's Vegetable Compound carry them safely through this crisis as it did Mrs. Brown.

You are invited to write for free advice. No other medicine has been so successful in relieving women's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass.

The Model House

will not stay model long if inferior, unseasoned lumber has been used in its construction. It will retain its beauty and serviceability for untold years if built with such lumber as we furnish. Isn't it better to build so that you'll have a house that will last for years without repairs rather than one that keeps on costing all the time?

A Great Institution

During the last week of May some forty or fifty editors of Saskatchewan newspapers assembled at the University of Saskatchewan for their fifth annual convention and second annual short course for editors. For several days each year Saskatchewan editors thus live in a University atmosphere, not only holding their meetings within the college walls, but sleeping and eating in one of the student residence buildings and having placed at their disposal all the facilities of this institution of higher education.

What this means to the newspaper men it would be difficult to over-estimate, and that the editors appreciate the opportunities thus afforded them was demonstrated by an attendance this year two and one-half times larger than a year ago. The assistance and encouragement thus given the press of Saskatchewan by the provincial university is bound to have a markedly beneficial effect as the years pass in the raising of the standard of journalism in the west.

Reciprocal benefits must likewise unquestionably accrue to the University by reason of the closer relationship and understanding of the press toward that institution. By being brought into close personal touch with the University and learning of and studying the many-sided activities of that institution, the editors are coming to more fully appreciate the really wonderful work it is carrying on and directing in the interests of the people, and they will not be backward in bringing to the attention of the people the advantages to be obtained through a loyal support of the University.

In the course of a brief address to the editors, preliminary to an inspection of the University plant and equipment, Dean Rutherford of the College of Agriculture, quoted some striking figures as indicating what the education of farmers' sons means to them and to the country in actual dollars and cents, apart from the decided advantages in other ways which the educated man possesses over the uneducated. He stated that as the result of comprehensive surveys made in a number of States to the south it had been ascertained that among farmers possessing equal means in the way of land, farm equipment and capital, the man with an education made a greater success than the man lacking such equipment.

Of farmers with equal opportunities in every respect, except in the matter of education, the following facts were established:

Those who attended the common school had a labor income for themselves of \$318.00 per annum.

Those who attended high school had a labor income of \$620.00.

Those who had attended college had a labor income of \$851.00.

A somewhat similar survey of Dundas County, Ontario, had revealed the

fact that out of 100 farmers surveyed, 98 percent had no education except that obtained in the elementary school, notwithstanding the fact that there were four high schools in the county, thus demonstrating the regrettable fact that the boys who attended high school had not gone back to the farms.

Why is it that the college educated boy makes such a greater success of farming than the one who lacks such training was revealed to the editors as they made their tour of inspection of the University. On one part of the University farm extensive experiments were being carried on to demonstrate the value of crop rotation, and the best crops to follow each other. Other experiments had as their object the ascertaining of the best methods to prevent the blowing away of the soil, which is the cause of heavy losses annually when high prairie winds prevail. Elsewhere demonstrations were carried on to show the best type of horses, cattle, sheep and swine to breed in this country, and the nature of the crops which should be grown in connection with these types. In the well equipped farm mechanics building almost every type of tractor and other classes of farm machinery were in evidence where the students were trained in the handling and repair of machinery with a view to securing maximum results from their use. Lastly, through the agency of the Better Farming Train, which was standing on the university grounds preparatory to starting out on its tour of the province, there was revealed the practical, common-sense manner in which the university is carrying to the people far and wide the lessons learned as a result of the research work carried on at the university.

The University of Saskatchewan is unique among institutions of its kind that it embraces within the scope of its activities, not merely the arts and sciences, but everything that closely touches the lives and businesses of all classes of people, paying particular attention to the primary industry of the west, agriculture, whereas in most provinces and states agricultural instruction is quite separate and distinct from the universities.

The site of the University of Saskatchewan, consisting of 1,600 acres, is beautifully located on the banks of the Saskatchewan River, overlooking the city of Saskatoon. The magnificent buildings are built of native stone, obtainable only a few miles away, and year by year additional buildings are erected. Over \$2,000,000 has already been expended, and the ultimate plans call for the erection of a score or more handsome buildings and the expenditure of many more millions of dollars.

Minard's Liniment Lumberman's Friend.

The Persian Gulf and its coasts are in summer about the hottest place on the earth's surface, a temperature of 120 degrees in the shade being not uncommon.

CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the other ailments due to a clogged condition of the bowels will find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which can always be depended upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them Mrs. Thomas A. Boutot, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were of great help to me when my baby was suffering from constipation." The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont.

At the end of 1917 Germany had more than 83,000 women metal workers.

A perfect shave in 3 minutes

is AutoStop Razor service. Stropping and cleaning without taking anything apart, without even removing the blade from the frame is an exclusive AutoStop feature.

And the quality of the shave is the kind you are craving for!

Your dealer will demonstrate the AutoStop Razor to you. He will guarantee to refund your money, if the razor does not prove to your entire satisfaction.

AutoStop Razor

—sharpen itself

Only \$5.00 — complete with strop and twelve blades in an attractive assortment of cases.

AutoStop Safety Razor Co., Limited
AutoStop Building, Toronto, Canada

Maximum Egg Production

Selecting Type of Hens For Their Laying Ability

Do you keep "just a few hens," and do they roam at large, laying eggs in nests of their own selection? Or do you "keep hens"—bred-to-lay hens, and are you realizing the maximum in egg production from them?

Once in a while we find a farm flock where there is no effort made to select hens for egg production. True, the owner believes in giving the flock good and abundant feed, but puts no faith in the study of laying types and the keeping of trapezoid records. Soon, very soon, only enough birds are kept to supply the home, and so long as the flock produces sufficient eggs for breakfast every morning, he is satisfied.

But he is a foolish man. Look at the dairy industry — see how it is advancing because of the great improvement in breeding stock. If good cows will produce good offspring with the ability to produce large quantities of milk, doesn't it sound reasonable that high-producing hens should also produce a large percentage of their offspring with the laying ability stamped on them. Of course, not all of the progeny may be up to the standard of the mother, but we do know that they are more apt to be quality stock than the offspring of a scrub with a poor record. Actually, it sometimes does seem like a joke to study laying types and try to estimate a hen's egg production. But it is not so funny to be using expensive poultry feed and not receiving eggs to sell. And it certainly is a great satisfaction to keep hens that pay their board and leave a profit to the owner after the board bill is paid.

Dairymen know what testing has meant to them. Now poultry men are finding what the test means in determining poultry profits.

Empire Building by Air

In the course of one year the ends of the British Empire have been reached by aircraft from England, the Atlantic has been spanned, and the journey of over five thousand miles from Cairo to the Cape has been accomplished. Twenty-five years ago and more it was the dream of Cecil Rhodes to build a railway from Cape Town to Cairo—but geography prevented it. The airplane has at last given reality to his dream. And dreams not only his. To reach Cairo by air, one passes over the Icarian Sea, and the airway to India lies above Palestine; where Isaiah saw the vision of the six-winged Seraphim, and on through Assyria, where winged creatures adorn the palaces.

Manitoba's Wheat Production

The total value of Manitoba's 1919-1920 wheat crop is estimated at \$118,850,400. Last year the province had 2,913,000 acres sown to wheat, and the latest returns given show an average yield of 17 bushels to the acre.

Japanese Fishermen Gaining Big Hold

Getting a Corner on B. C. Salmon Fisheries According to Statement

That the Japanese fishermen are gaining much too strong a hold on the salmon fishing industry in British Columbia was the statement made by Lieut.-Col. Peck, V.C., to the parliamentary committee on pensions and re-establishment. Last year there were 2,277 Japanese licenses as against 417 native-born Canadians. The Japanese "jiggled" their naturalization papers back and forth and so overcame the law which required naturalization before a license could be issued. Col. Peck declared that 50,000 more returned men had gone to British Columbia than the total number which were overseas from that province.

William Foran, secretary of the civil service commission, said that of 60,000 civil servants, 25,450 were returned men, but only 7,609 were permanent.

The commission had recommended after the armistice that no further appointments be made permanent until all Canada's soldiers were home. The government did not accept the recommendation.

The Death Warrant Delivered

No defence can be offered when you apply Putnam's to a sore corn the offender has to die. Nothing so certain as to quickly cure corns as Putnam's Corn and Wart Extractor, try Putnam's, it's free from acids, and painless. 25c. bottles sold by all dealers.

Keep Tires Inflated

Soft Tires Are Comfortable But Also Expensive

Some motorists do not keep the tires properly inflated, giving as their reason that the car rides so much easier with a soft tire, and that when inflated to the pressure recommended by the maker, the car rides hard.

If one can afford such luxury, well and good, but it is expensive comfort. Under-inflated tires means a greater consumption of fuel, a breaking up of their fabric due to the weaving movement and other stresses that separate the plies of the fabric, and shorten the life of the casing. With the cost of tires rising, it is economy to observe the instructions of their makers, and if the car rides hard, to try to discover the real cause of the trouble and remedy it, instead of wearing out costly tires.

Every jolt which you spare yourself by unwise under-inflation, will come back to you in another form when you find out how much you are out-of-pocket for tires.

Catarh Cannot be Cured

by LOCAL APPLICATIONS, as they can not reach the seat of the disease. Catarh is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE will cure catarh. It is taken internally and acts through the blood on the seat of the disease. The perfect combination of the ingredients in HALL'S CATARRH MEDICINE is what produces such wonderful results in catarh conditions. Druggists 75c. Testimonials free. F. J. Cheney & Co., Props., Toledo, O.

Crop Prospects Good

Saskatchewan Department of Agriculture Issues Favorable Report

Crop reports prepared by the statistics branch of the Saskatchewan department of Agriculture make satisfactory reading, and conditions generally throughout the province indicate that the 1920 crop has got away to a good start, and given favorable weather, should result in a good yield. Damage by high winds varies from zero to 10 percent. The greatest damage from this cause having occurred in the central and southwest districts. In practically all cases where wheat was blown out, it is being reseeded to oats and flax.

Many large districts, however, report no damage, and the bountiful rains of May 25 and 26 are responsible for this situation. While grasshoppers are reported to be hatching out in the southeast and central districts, they have as yet done no damage. They are small at present and in some localities are reported thick.

Ask for Minard's and take no other.

Advertising Bill for Recruits

The amount of money spent in newspaper advertising for recruits to the C.E.F. in all Canada was \$45,184, according to a return tabled in the commons at the request of Joseph Archambault (Chamby - Vercheres). Of this sum, \$42,739 went to English papers, and \$2,444 to French. In Quebec \$6,238 was paid to English papers and \$2,262 to French papers.

New Settlers for Canada

First Contingent of the British-Canadian Farmers Land Syndicate

The tide of immigration that is now passing through Montreal to the Canadian West included the other day a sturdy group of young English and Scottish farmers, forming the first contingent of the British-Canadian Farmers Land Syndicate, an overseas organization which has secured large tracts of land in what is called the Spirit River settlement colony in Alberta. In the West each settler is assigned 160 acres, or a quarter-section of land, with the option of adding another 160 acres when the first tract has been improved. The district they were going to be situated about 300 miles northwest of Edmonton.

At the Yarmouth Y.M.C.A. Boys' Camp, held at Tusket Falls in August, I found MINARD'S LINIMENT most beneficial for sunburn, an immediate relief for colic and toothache. ALFRED STOKES, General Sec'y.

After the Sea Lions

B. C. Fishermen Say One Will Eat 50 Pounds of Fish A Day

Large numbers of sea lions on the British Columbia coast, which destroy annually vast quantities of food fish may be slaughtered and their hides placed on the market to reduce the world's leather shortage. The proposal, first put forward by Premier Oliver, has the approval of many experienced fishermen. One Prince Rupert pioneer declared that with three companions he had killed 700 sea-lions on the Queen Charlotte Islands in two days. The sea-lions, it is said, weigh from 2,000 to 2,500 pounds. The hides are nearly an inch in thickness and make a tough and durable leather—such as is used in workmen's gloves and saddles. Fishermen declare that a sea-lion will eat fifty lbs. of fish in a day.

The tallest grass is pangas. It is so tall that a man on horseback often cannot see over it.

You can make almost any man nervous by telling him that a policeman was asking about him.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" is the thumb-print of genuine Aspirin. It positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package. There is only one Aspirin—"Bayer"—You must say "Bayer." Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticester of Salicylicacid. While it is well known that Aspirin is a Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

This time of year it's a good idea to combine fresh fruit or berries with your morning dish of

Grape-Nuts

The blend of flavor proves delightful and is in tune with June.

"There's a Reason"

Problems of West Discussed at Big Industrial Congress

Calgary.—The second annual industrial congress opening at Calgary attracted several hundred business men and farmers from all parts of the country. A feature was the appearance of 200 members of the Canadian Manufacturers' Association and the weather man was of good behaviour. President M. A. Brown opened the congress, and premier Stewart welcomed the delegates and visitors. In his address he emphasized the value to the country of the organized effort that had made the meeting an annual affair. As president Howard of the manufacturers' association said the work of the congress is on a big scale, managed by men of vision who are helping put the west on the map and develop a spirit of co-operation throughout the Dominion. Col. Dennis discussed irrigation, one of the important problems of the west, and F. H. Peters, commissioner of irrigation, talked along the same lines. T. A. Hornbrook, president of the board of trade, and mayor P. C. Marshall, of Calgary, added their voices to the general note of welcome. The speeches were concluded by R. B. Bennett.

Hon. Geo. P. Smith, speaking as the representative of the province, said that the province was anxious to encourage a well rounded business community. He knew there was some uncertainty in general conditions, but he believed the city just as necessary as the rural district. All classes are necessary in this day of complicated social conditions. The province is anxious to encourage manufacturing industries, but only those which find conditions here reasonable and natural. Speaking of the conflict between consumer and producer, the speaker said he thought profiteering had been done by capital. If manufacturers could convince the country that they were doing all they could to bring prices back to normal, it would be less difficult to induce labor to accept more moderate wages, but he desired to emphasize that he did not believe profiteering was confined to any particular class. It was general. T. A. Hornbrook, president of the board of trade, called attention to the fact that Calgary is the centre of the second largest irrigation system in the world. Brig-Gen. MacDonald, general manager of the Industrial Development Association, received a great ovation when he replied to the addresses of welcome. He was sure the work of the organization was sound, and was appreciated by the country generally. He thanked the visitors for their contributions and activities in behalf of the association. Col. J. S. Dennis was greeted enthusiastically when he was introduced as the greatest authority on irrigation on the continent. Col. Dennis spoke with the authority of 48 years in western Canada in the services of the Dominion government, Hudson's Bay Company and the Canadian Pacific Railway. Capital and labor, he contended, had been the success of colonization and development. The payment of the national debt cannot be settled except by colonization and industrial development. Thirty million acres of selected good agricultural land is today lying idle within fifteen miles of the established railway lines of the four western provinces.

Discuss Value of Good Roads as Aid to Agriculture

Winnipeg.—The value of good roads as an aid to agriculture, as a factor in the development of the country and as an inducement to tourist traffic, were some of the topics, apart from the professional and technical ones that were discussed at the two sessions of the Canadian good roads convention here.

Hon. F. C. Biggs, minister of public works, Ontario, declared that the best way to increase production was to keep the boys on the farms, said that they had come to realize in the eastern province that they must have improved roads for bringing the boys to the consolidated schools and continuation schools, they were providing so that the children on the farms would not have to travel to the towns

Budget in Committee

Luxury Tax Will Likely be Subjected To Some Changes

Ottawa.—The formal budget debate out of the way, consideration of the budget resolution in committee will open with the least possible delay. Here, in all probability discussion will be protracted, covering possibly a week or so. Provisions made in regard to income tax and business profits tax are expected to go through without a doubt.

The luxury taxes will be subjected to some changes, it is thought, particularly with a view to making their administration more workable. Since the budget was brought down the minister of finance has been in constant receipt of representations with regard to the luxury taxes and the sales tax. Important points have been brought up and notice will no doubt be taken of some of the suggestions. In addition to any amendment which the finance minister may propose, it is likely that a number will be submitted by members of the opposition.

Some Profit in Clothing

Farmer Sold Wool For Fifty Suits and Got One With the Price

Toronto.—The Globe published the following despatch from Hickman, Ky.:

Roy Shaw, a well-known farmer living near Hickman, took 200 pounds of wool to Hickman the other day, which he sold for 30 cents a pound, or for \$60.00. Then he purchased a suit of clothes for his son, and found that the money he received for the wool was just enough to pay for the suit. He says there are about four pounds of wool in a suit of clothes, and on that basis the wool he sold at \$60 a suit, would bring the seller \$3,000. Allowing one-half for labor and other materials going into the suit, somebody will get a return of \$1,500 on a \$60 investment, he figures.

Respect Wishes of Canada

Do Not Consider it Advisable to Publish Correspondence

London.—In the house of commons recently the colonial under-secretary of state said it had been agreed by the British and Canadian governments that it would be inadvisable to publish at present the correspondence regarding the appointment of a Canadian representative at Washington. Percy Hurd and Sir Richard Cooper demurred somewhat at this answer but Andrew Bonar Law said that the British government must consider also the desires of the Canadian government in such matters.

Chief of Police

St. Paul, Minn.—Thomas E. Campbell, for three years chief special agent in the Minnesota bureau of investigation, department of justice, has accepted the post of chief of police in St. Paul, effective June 6.

For Relief Work in Europe

Several Governments Have Arranged To Help in Rebuilding the Central Countries

Paris.—New and substantial credits for the relief and reconstruction of Central European countries, including Austria and Hungary, have been arranged by the governments of Great Britain, Denmark, Holland, Norway, Sweden and Switzerland. The credits are mainly in the form of raw materials and food and although the United States is not officially represented on the committee, it is co-operating in a large way, it is stated, by providing commodity credits for Central Europe.

Britain Builds Huge Airship

R-80 Will Be Equipped With All The Latest Improvements

Barrow, England.—Airship R-80, built here for the admiralty, will be launched this week. She embodies the latest improvements in aircraft design and it is stated that she would fly across the Atlantic with ease. The vessel is 535 feet in length and 70 feet wide. Her lifting power is 38 tons. Four engines, each of 240 horsepower, will give her a maximum speed of 65 miles per hour. She will carry a crew of 15.

No Military Compulsion

Signing of Peace Treaty Has Rescinded Conscription In Germany

Berlin.—It is semi-officially announced that no law will be enacted abolishing compulsory military service which is demanded by the peace treaty, because the national assembly's acceptance of the treaty automatically rescinds the former compulsory resolutions. This objection has been issued in view of the allegations that Germany is not carrying out the provisions of the treaty.

It is also announced that the minister of defence will issue a decree forbidding discharged soldiers to carry service rifles and hand grenades. This order is somewhat belated, as according to reports, thousands of discharged men all over the country are in possession of their full army outfits. A few days ago the police seized, near Hanover, 194 hidden rifles and 190 swords and 10,000 cartridges.

Value of Good Railways

Hon. S. J. Latta Speaks of the Importance of Good Roads

Winnipeg.—The keynote of all good work in western Canada, and for that matter throughout the whole Dominion, was struck by the Hon. S. J. Latta, minister of highways for Saskatchewan, at the conclusion of the Canadian Good Roads convention when he affirmed that the essence of patriotism was the home, and that the things that touched the home the nearest was transportation facilities. The minister had been describing the new Canadian problem of the west, and the making of the immigrant of European nationality a British citizen, and he impressed his hearers that they had not only to get these people to understand the institutions of Canada, but they had to get them into a receptive frame of mind, and nothing would do more to produce this, he said, than getting them to love the country, because of what the country was doing for them.

Japan Suspects Plot

Negotiations for Buffer Siberian State Are All Off

Honolulu.—Japan has broken off negotiations with the Russian Bolsheviks for the formation of a buffer state in Siberia, according to a Tokyo cable to the Nippon Jiji, a Japanese newspaper here.

The breach in negotiations came about as a result of Japan's discovery of a plot to undermine General Semenov, commander of the all-Russian forces in Siberia and bring the Baklan region under the Bolsheviks, the cable stated.

Weather Aids Wheat Crop

Brandon.—The rains and cold weather of the past few days have been of immense benefit to the crop in the Brandon district. One week ago, due to the dust storms, many fields looked brown and bare. Today everything is green and the roots of the wheat are driving deep down in the earth, making for a vigorous and sturdy growth and a promise of ability to withstand drought, should there be one at a later date.

W. N. U. 1319

Cowardly Attacks in Ireland

Five Members of Irish Constabulary Beat Back Five Hundred Rebels

Toronto.—The Toronto Evening Telegram published the following despatch from its correspondent at Belfast, Ireland: "Boys, don't mind me. Stick to your posts," shouted Sergeant Fitzpatrick, of the Royal Irish Constabulary, at Crossgan, 20 miles from Belfast, when he went down with a bullet through his lung while defending the barracks with five men, against an attack of five hundred rebels.

The attacks lasted two hours, during which the barracks were sprayed with petrol. The police fought stoutly, and wounding several raiders, succeeding in beating them off. The raiders spoke in Irish when commands were given.

Fitzpatrick, a native of Fermanagh, and Constable Ramsay, conducted the defence. After Fitzpatrick was badly wounded, though he was so badly hurt he had to be bleeding on the floor, he still managed to counsel what to do in moments of distress. Constable Carry was wounded in the knee.

The attack on Clare barracks, Kings County, cost the rebels three killed and several wounded. Hand grenades knocked over several raiders. A man's jaw and a finger and a cap with a bullet hole through it were found on the scene by the military who came to the rescue.

Continue Wheat

Standards in U.S.

Reduction Urged Would Decrease Return to Farmers

Washington.—Continuation of the present federal wheat standards was decided upon by Secretary Meredith in an opinion covering hearings held in an opinion covering hearings held in the central-northwest with existing grades for hard red spring and durum wheat. Request for lowering the present standards, the secretary announced would tend to decrease the return to farmers while advocates of the change argued that the producer would receive more money for his wheat.

The federal standards established in 1917 and revised in 1918 have been operative only under fixed price and war conditions, the secretary stated, adding that opportunity for fair tests of their merits or defects have not been afforded under normal marketing conditions.

Bid Sir Thos. Lipton Good Luck

Starts For America in Quest of the Cup With His Boat Shamrock IV.

London.—Crowds of people were at the station to wish Sir Thomas Lipton bon voyage and good luck in his quest for the American cup, with his boat Shamrock IV, against either the Resolute or the Vanitie. Dowager Queen Alexandra, in expressing her hopes that Sir Thomas would win with the Shamrock IV, said: "Certainly I am confident, but I am glad I am not too sure, for then there would be no sport for anyone."

Shortage of Laborers in West

Calgary, Alta.—That the west could absorb at least 20,000 men for railway construction, farm work and mining, was the statement made by Grant Hall, vice-president of the Canadian Pacific Railway, in the course of an interview here.

D. C. Coleman, vice-president of western lines, who was also present, confirmed this great shortage. They stated that there was a scarcity of unskilled labor in the east today, also, but not to the same extent as in western Canada.

Yukon Free of Ice

Dawson, Y. T.—The Yukon River is now entirely free from ice from Lake Labarge northward. Advice from interior Alaska say all restrictions there against travel because of influenza are being lifted as there have been no new cases in the last 13 days. The first arrivals from Mayo Camp bring highly favorable reports of silver prospects in the Keno Hill district.

Safeguard Interests in Persia

London.—In reply to a question in the house of commons regarding the Bolshevik activity in Persia, Cecil B. Harmsworth, under-secretary for foreign affairs, said the Persian minister in London had been in constant touch with the British foreign office, and a complete understanding had been reached that both Persian and British interests would be safeguarded.

Britain is Not Yet Prepared to Trade with Russia

The Newspaper Situation

Sir Henry Drayton Tells Manufacturers Government Will Insist On Domestic Supply

Ottawa.—The conference with the newspaper manufacturers, announced in the house took place in the finance minister's office. Sir Henry Drayton told the manufacturers that the government was much disturbed to find that, knowing the agreements made last fall, twenty-five percent of the daily newspapers in Canada were facing the period of suspension owing to inability to get newspaper paper, although willing to pay current prices for export to foreign countries. He said the government would insist upon the domestic requirements being supplied as they represent only 15 percent of the total production.

The situation is still regarded as very serious. The publishers are emphasizing the point that the total amount of newspaper necessary to the continued existence of the 26 daily newspapers affected represents less than two percent of the exports of newspaper and that they ask for no favors regarding price.

The publishers state that the great majority of the mills are keeping their Canadian customers supplied, and that the present crisis has been caused by the attitude of a very small minority.

The Hearst newspapers also had a representative in Ottawa interviewing the government regarding newspaper supplies. It is said that the consumption of newspaper of the Hearst papers is 200,000 tons, a substantial portion of which is made in Canada.

Will Open Office in London

Cabinet Grants Permission to Soviet Government

London.—As the first result of the meeting of Gregory Krassin, Russian Bolshevik minister of trade and commerce, with Premier Lloyd George and members of the British cabinet, the soviet government, according to the Evening Standard, has been granted permission to open immediately a central trading office in London. At this office, the newspaper says, an endeavor will be made to organize an exchange of goods with British traders.

Rain Ends Forest Fires

St. John, N. B.—Heavy rain in Northern New Brunswick and other districts put an end to the menace of many fires. Two new fires were reported near Newcastle, and another on the southwest Miramichi, but they are under control. Situation in Victoria and Madawaska counties is much improved. The fire at Glenie on the Fredericton and Grand Trunk railway in Sunbury county, has burned about 1,200 acres.

Burned British Flag

Washington.—The United States department has asked the District of Columbia commissioners for a statement of fact as to the burning of a British flag in front of the treasury by women sympathizers with Irish freedom.

Want Government To Control Wheat For Another Year

Winnipeg.—Asserting that the Canadian Wheat Board cannot exercise control over the 1920 crop unless its authority is renewed at the present session of parliament, the executive committee of the Canadian Council of Agriculture telegraphed the Dominion government, urging that steps be taken to have government control of the wheat crop for at least another year. The resolution as forwarded to Ottawa, recites a resolution of the council of agriculture adopted last January, favoring government control of the wheat crop of 1920-21, provided that "controlled buying should be discontinued on the part of overseas importers of Canadian wheat" points out that the conventions of Alberta, Saskatchewan and Manitoba organized farmers subsequently approved

London.—Trade negotiations between the allies and Gregory Krassin, Russian soviet minister of trade and commerce, have not yet begun, according to Premier Lloyd George in the house of commons.

Replying to a flood of insistent inquiries, the premier said there were certain questions Great Britain wanted cleared up before it would undertake negotiations at all. It must guarantee that there will be no attacks on British interests in the east or at home while negotiations are proceeding. Mr. Lloyd George declared, and must guarantee to release all British prisoners. Great Britain must clear these questions out of the way herself, the premier added, after which allied negotiations could proceed.

Representatives of the French and Italian governments are in London.

It was further decided, said the premier, that the allied delegates were prepared to deal with the Russian delegates as to the best methods of removing the obstacles and difficulties in the way of resuming peaceable trade relations in the general interest of Europe.

The premier said that M. Krassin was the head of the delegation representing the Russian co-operative organization, but he was also minister of the soviet government and, as such, no doubt was acting in the name and under the authority of the Soviet government.

One of the members asked whether Krassin was not originally a German agent. The premier said he did not think he was, but that he was associated with a German firm of electricians. He was a Russian.

The members enquired whether it could be taken that the perturbation of the French public was without any foundation and that the negotiations were being acted upon. The premier replied: "I am not aware that there is great perturbation in France. The mere fact that some French newspapers are trying to foment trouble between two friendly and allied countries, whose friendliness is essential in the interests of the world, is no proof of French perturbation."

This was received with cheers.

Troops Are Gathering

Sensational Reports of Concentration Of Bavarian Forces Comes From Potsdam

Berlin.—The Tagblatt publishes under reserve sensational reports of the concentration of Bavarian troops in the neighborhood of Potsdam, and that Prince August Wilhelm, of Prussia, son of the former emperor, is playing a prominent part in the movement. It also publishes a rumor that the authorities intend in future to arrest all pacifists and a number of prominent Leftists.

Geddes Given Honorary Degree

Washington.—George Washington university, at its ninety-ninth annual announcement exercises conferred the honorary degree of Doctor of Laws on Sir Auckland Geddes, ambassador to the United States. Ambassador Geddes delivered the commencement address.

FREE AIR SERVICE

will be available at our garage in just a few days. This service is free to everyone and we hope you will avail yourself of it often, because the life of your tires is greatly increased by keeping them well inflated. A soft tire makes a tube "creep" which ruins the tube as well and will soon cause a leak.

Why not get that car of yours overhauled before the season is gone too far. You will be surprised the amount of extra power it will have.

We can repair any radiator

Peas And Clover Benefit By Treating Seed With Bacteria

It is a well established fact that alfalfa, field peas, alsike clover, red clover, white dutch clover, white sweet clover, yellow sweet clover, sweet peas require a particular kind of bacteria to produce the most vigorous kind of stems, leaves and seed. The bacteria living within the nodules or swellings have the power to gather the free nitrogen of the air and to build it up into nitrogen compounds, which are very essential to the growth of the plant and the production of seed. The greater the number of these bacteria that occur within the roots of a plant the more vigorous the plant is.

In order to secure the necessary kind of bacteria in the soil in which a particular kind of legume is to be grown, the inoculation of the seed with a pure culture is recommended. The cultures are usually grown in two ounce bottles each bottle containing sufficient bacteria to inoculate sixty pounds of seed. Full directions are enclosed within each mailing case.

Cultures for the inoculation of the seed of alfalfa, field peas, alsike clover, white seed clover, yellow seed clover, crimson clover and sweet peas may be had by applying to the principal of the school of agriculture, Claresholm, Alberta. Applicants should state the number of each kind of culture that is required.

**Steps You Should Take
In Chicken Raising**

Although Persons Differ, The Principles Of Feeding Are The Same

(By PROF. M. C. HERNER)

In most farms the hens are still used for brooding the chicks. Where this is done, they should be thoroughly dusted with some insect powder just before hatching time. If body lice do come on the chicks, it is well to put a drop or so of some oil, vaseline or lard on the head and under the wings to rid them of these lice. Only one hen should be put in a coop and the coops should be placed far enough apart so that the chicks from one coop will not stray over to the other when they are stronger, and when the old hen is likely to peck them to death. It is also best to keep chicks of different sizes separate as much as possible, so that the smaller ones will enjoy a proper chance. The coops should be bright and airy, so that the mother hen can be comfortable. They should be arranged that they can be closed up at night to keep out weasels and rats. The coops should be moved to new, clean and grassy spots every few days.

There are, hardly two persons agreed on details in connection with feeding. The principles of feeding, however, are the same, even if we differ in methods. Chicks do not require anything to eat for the first thirty-six hours after hatching. Nature has provided enough for them to this time. The first feed can be made of three parts of stale bread moistened in milk, and pressed out and mixed with one part of hard boiled egg cut up fine, shell and all. This should be fed three times a day, in addition, some grain should be fed. Small cracked wheat is as good as anything. Commercial chick feed is best but it is usually pretty high in price. Pinhead or granulated oatmeal mixed with this small wheat makes a good combination. Feed this two or three times a day, alternately with the stale bread as above. If milk is available give them all they will drink. Feed it sweet or sour, but do not change from one to the other. The milk may cause looseness of the bowels but this can be counteracted to some extent at least by feeding dry mash.

Feed wheat, oats and barley, equal parts, finely chopped, will make almost an ideal mash for chicks from hatching time to maturity. A little granulated charcoal should be added. Little chicks will eat as much of dry mash as of anything else they can get. Feed it in pans so arranged that the old hen cannot scratch it out and waste it. Better put it under a small slatted run where no hens can get to it. Of course, there will be no trouble

from outside hens if the chicks are reared away from the old hens, as they should be. A few shovelfuls of coarse sand should be thrown somewhere near the coops. This takes the place of grit. But few farmers seem to realize the real value of the dry mash combined with buttermilk as a drink. There is nothing like it for growing chicks. It should be fed in small, fairly low dishes with inch mesh wire lying in on top of the mash. Meat or table scraps may take the place of milk if milk is not available. All grain and dry mash should be hopped fed when the chicks are four weeks of age. Bread and eggs should be discontinued when the chicks are ten days to two weeks old. Whole grain should gradually take the place of the cracked grain, unless corn is used. This is better cracked than whole.

Some Pointers On Feeding

If the following suggestions are followed, the chicks are likely to get a good start, grow well, and be strong, vigorous and healthy:

1. Give the first feed when the chicks are from 36 to 40 hours old, feeding too soon may cause bowel trouble.
2. Coarse sand or grit and green food should be within reach at all times. Grasses, weeds and sprouted grains usually furnish an abundance of green food.
3. Sour milk or buttermilk should be given from the start. These furnish the water required to make body growth, and the acid in the milk helps to digest the food. Buttermilk is the cheapest flesh-forming food that can be secured. To show the value of buttermilk for feeding chicks, an experiment was conducted by the poultry plant of the agricultural college. Two lots each of 100 White Leghorn chicks were taken from the incubators to the brooders and for nine weeks were fed exactly alike, with the exception that one lot got only buttermilk to drink, whereas the other lot had only water. At the beginning of the experiment there was only half an ounce difference in the weight of the two lots and at the end of the nine weeks the buttermilk lot weighed thirty-six pounds heavier than the lot which had only water to drink.
4. Dry mash makes the chick grow and helps to counteract the loosening effect of the buttermilk.
5. Wet mash will help to make the chicks grow faster. Do not feed too wet or sloppy as it will cause bowel disorders.
6. Free range will provide room for exercise and scratching and will produce strong healthy vigorous growth.
7. Variety in grain and other foods will be relished by the chickens.
8. Mineral matter or ash is necessary for the growth of flesh and bone. The ordinary farm grain along with the insects and grains the chicks pick up will usually furnish mineral matter in sufficient quantity to produce good growth. Better results, however, can be obtained by feeding bone meal and beef scrap to get more flesh and bone growth. But under ordinary farm conditions, this is hardly practical, as the price of these special feeds is out of reach and too high compared with their food value.
9. Cleanliness in both the care and the feeding of chicks will prevent disease and lice.

During the first few weeks feed often and only a little at a time. Feed early in the morning and late in the evening to shorten the period between the evening and the next morning meal. Avoid overfeeding.

FEEDING INCUBATOR CHICKS

One of our most successful incubator men gives the following instructions for feeding young chicks: "My chicks remain on the tray of the machine until they are quite dry. Then the tray is removed and they stay on the floor of the incubator for a day and one-half. Before putting any of the chicks into the brooder, it is previously heated to 100 degrees and the floor covered with fine shavings or a light sprinkling of thoroughly dried saw-dust. This tempts them to scratch and provides exercise. A board four inches outside the hoveer confines them so that if they lose their bearings they do not get too far away and become chilled."

"Water is before them but they get no feed for four days except broken bits of alfalfa leaves. The yolk, which was absorbed by them just before hatching, supplies all the food necessary until the fourth day. I then start them on cracked wheat. At seven days of age I give them a small quantity of high-grade beef scrap, and they are never without this until they go into the laying house in the fall. I feed nothing but broken wheat and the beef scrap until the birds are 14 days old, when by that time other grains may be substituted for half the wheat if that commodity is expensive. After the fourteenth day the amount of green feed which the chicks get may be in unlimited quantity. Lettuce is very valuable, cut grass, alfalfa or turnip pulp, will

be found very acceptable. It reduces the cost of raising chickens to feed a dry mash of ground grain and beef scrap, but the birds do not exercise so well as when they are obliged to scratch."

Use coffee instead of water when stirring up a simple chocolate icing and its richness and flavor will be improved.

VIKING

Baseball for 1920 got a decided boost at a meeting held Wednesday evening when a representative gathering of fans met to discuss ways and means of putting a baseball team in the field this year.

J. L. Slavik, manager for 1919, gave the report for last year and showed a slight balance on hand. The team had a very successful season winning enough money to finance everything without asking the town for a cent. Manager Slavik and the team was congratulated on the good showing.

It was unanimously decided to try again this year, and Mr. W. J. Jones was elected manager and J. L. Slavik sec'y. The meeting promised that everyone would get behind the movement and boost it

to the limit. It is thought that there is enough baseball material in the district to make a fairly good team.

The newly elected manager is no stranger in this community when it comes to baseball there is no more enthusiastic fan and a supporter of the grand old game.

Mr. Slavik was appointed delegate to the baseball meeting at Wainwright last Friday where a league was formed between Wainwright, Viking and Irma which will be known as the Buffalo League. Rules and a schedule are being drawn up
